</tr>
</tbody>
</table>

REMEMBER: ALWAYS USE THE APPROPRIATE PERSONAL PROTECTIVE EQUIPMENT.

Homes built before 1978 may contain lead paint. All replacement installations must comply with the U.S. EPA’s Lead-Based Paint Renovation, Repair, and Painting Program (RRP Rule). Read more about the RRP Rule and lead-safe work practices, on the U.S. EPA’s website at: www.epa.gov/lead

1 REMOVE BRICKMOLD CLADDING & INSTALL ENTRY DOOR SYSTEM

Step 1 - Remove frame and brickmold cladding (see illustration).

Step 2 - Install entry door according to installation instructions included with door.

2 SECURE FRAME IN COASTAL REGIONS FOR WINDLOAD CRITERIA (IF APPLICABLE)

You must secure the brickmold and jamb frame as specified in the installation instructions by the Florida Building Commission or your applicable local & state building codes.

Step 1 - Secure the brickmold and jamb frame using #8 x 3” Phillips Flathead Screws as specified in the installation instructions by the Florida Building Commission.
**3. APPLY CONSTRUCTION ADHESIVE**

Step 1 - Using a construction adhesive, apply ample beads of adhesive on both the frame and exterior of brickmold.

**5. CAULK EXTERIOR**

Step 1 - Using a ProVia color matched caulking or any other high quality caulking in accordance with ASTM C 920 Class 25, caulk the exterior frame and brickmold cladding (see illustration).

**4. RE-INSTALL BRICKMOLD & SECURE**

Step 1 - Re-install brickmold and frame cladding and tack in place with ¾” or 1” brads (see illustration).
