SECTION 08110
STEEL DOORS AND FRAMES

PART 1 GENERAL

1.1 SECTION INCLUDES
A. Steel doors and steel frames.

1.2 RELATED SECTIONS
A. Section 04800 - Masonry Assemblies.
B. Section 08210 - Wood Doors.
C. Section 08710 - Door Hardware.
D. Section 08800 - Glazing: Glass for door lights and borrow lights.
E. Section 09250 - Gypsum Board.
F. Section 09900 - Painting: Field painting of doors and frames.

1.3 REFERENCES
A. ANSI A250.3 - Test Procedure and Acceptance Criteria for Factory Applied Finish Painted Steel Surfaces for Steel Doors and Frames.
B. ANSI A250.6 – Recommend Practice for Hardware Reinforcing on Standard Steel Doors and Frames.
E. ANSI A250.11, Recommended Erection Instructions for Steel Frames.
I. ASTM A 1008/A 1008M – Standard Specification for Steel Sheet, Cold-Rolled,
Carbon, Structural, High-Strength Low-Alloy, High-Strength Low-Alloy with Improved Formability, Solution Hardened, and Bake Hardenable.

N. UL 10C - Positive Pressure Fire Tests of Door Assemblies.

1.4 SUBMITTALS

A. Submit shop drawings under provisions of Section 01300.

B. Product Data: Manufacturer’s data sheets and specifications.

C. Shop Drawings: Include schedule identifying each unit, with door marks or numbers referencing drawings. Show layout, profiles, product components and anchorages.

D. Certificates: Product certificates signed by the manufacturer certifying frame material compliance with ANSI A250.8, specified performance characteristics and criteria, and physical requirements.

E. Installation Instructions: Manufacturer’s printed installation instructions.

F. LEED Submittals: Provide documentation of how the requirements of Credit will be met:
   1. List of proposed materials with recycled content. Indicate post-consumer recycled content and pre-consumer recycled content for each product having recycled content.
   2. Product data and certification letter indicating percentages by weight of post-consumer and pre-consumer recycled content for products having recycled content.
   3. List of proposed materials demonstrating that each material was extracted, harvested or recovered, as well as manufactured within 500 miles of the project site.

1.5 QUALITY ASSURANCE

A. Fire Rated Doors:
   1. Doors shall be tested in accordance with UL 10B, "Fire Tests of Door Assemblies", NFPA 252, "Fire Tests of Door Assemblies", and UL 10C, "Positive Pressure Fire Tests of Door Assemblies".
   2. Doors must have an approved marking or physical label, applied by an authorized facility, in accordance with the procedure set forth by an independent certification agency.

B. All products shall comply with quality assurance standards, control plans, work instructions, and flow diagrams established within ProVia’s quality manual.

1.6 DELIVERY, STORAGE, AND HANDLING

A. Deliver doors and frames packaged in cardboard for protection while in transit. If delivered via common carrier doors must be palletized and protected.
B. Handle all packages with care as doors typically contain glass and are prefinished.

C. Protect all materials from the weather while storing. Avoid use of non-vented plastic or canvas shelters to prevent forming of humidity chambers that cause rust. Store in the upright position.

D. If cardboard wrapping becomes wet, remove contents immediately.

E. Provide 1/4 inch (6 mm) spacing between doors to provide air circulation.

PART 2 PRODUCTS

2.1 MANUFACTURERS

A. Acceptable Manufacturer: ProVia, 2150 State Route 39, Sugarcreek, OH 44681 Tel: 800-669-4711; Tel: 330.852.4711; Email: request info (info@proviadoor.com) Web: www.proviaproducts.com

B. Requests for substitutions will be considered in accordance with provisions of Section 01600.

2.2 MATERIALS

A. All steels used to manufacture doors must meet at least one or more of the following requirements:
   1. Cold rolled steel shall comply with ASTM A1008 and A 568.
   2. Galvannealed steel shall comply with ASTM A 653 and A 924.

2.3 DOOR CONSTRUCTION

A. Doors: Interior or Exterior
   1. Face Skin Thickness: 22 gauge
   2. Door Faces and Edge: Model 1 full flush design with visible edge seams. Faces available in flush, embossed, and textured.
   3. Thickness: 1-3/4 inches (44.5 mm).
   5. Door top & bottom reinforcements: Continuous steel channel bonded to face sheets extending full width of door. Minimum thickness of .058 inches (16 gauge).
   7. Lockset and deadbolt reinforcement: Composite lock block.
   8. Door Core: Polyurethane foam filled and fully bonded to face sheets. Total product U-factor as low as 0.20.

B. Fire Rated Doors: Ratings as indicated on Door Schedule, when tested in accordance with NFPA 252 or UL 10B or UL 10C.
   1. Labeled by UL, WH, or other agency acceptable to the authorities having jurisdiction.

2.4 FRAME CONSTRUCTION

A. Variable Depth Frame, complying with ANSI A250.8
   2. Hinge reinforcement: 14 gage spot welded, 10 gage equivalent number of threads (ANSI A250.6).
   3. Lockset and deadbolt prep: 18 gage spot welded, 14 gage equivalent number of threads.
   4. Adjustable frame depth (throat) for varying wall sizes.
5. Seal: Full perimeter weather stripping.
6. Fire rating: 90 minute, positive and neutral pressure.

B. Fixed Depth Frame, complying with ANSI A250.8.
   1. Material: 18 gage formed galvannealed steel sheet.
   2. Hinge reinforcement: 10 gage spot welded fully threaded.
   3. Lockset and deadbolt prep: 14 gage spot welded.
   4. Frame Depth: Fixed, as indicated on drawings.
   5. Corners: Mitered; mechanically fastened.
   7. Fire rating: 3 hour, positive and neutral pressure

C. Full Wood Frame
   1. Material: Pine
   2. Depth: 4 9/16”
   3. All frame members to be protected with Pine Guard

D. Additional frames borrowed from others.

E. Frame Anchors: Per manufacturer’s specifications.

F. Factory applied primer shall comply with ANSI A250.10.

G. Doors and frames to be factory primed with a two component catalyzed polyurethane.

H. Field Finish: All doors, frames, and components shall be cleaned and finished in accordance with the manufacturer’s instructions.

2.5 FACTORY PREFINISHED DOORS

A. Factory applied finish shall comply with ANSI A250.3.

B. Primer: Doors and frames to be factory primed with a two component catalyzed polyurethane.

C. Factor Applied Finish: Two component catalyzed polyurethane, heat cured.
   1. Available in manufacturer selected colors and stains.
   2. Factory stained products must include a protective clear coating containing UV inhibitors.
   3. Custom finishes available by request

PART 3 EXECUTION

3.1 EXAMINATION

A. Before beginning installation, verify that substrate conditions previously installed under other sections are acceptable for installation of doors.

B. Verify door frame openings are installed plumb, true, and level.

C. Verify margins between door and frame are correct and check for any paint scratches.

3.2 INSTALLATION

A. Install frames plumb, level, rigid and in true alignment in accordance with ANSI
B. Install doors per manufacturer’s instructions.

C. Install hardware in accordance with the hardware manufacturer’s recommendations and templates.

D. Install fire-rated doors and frames in accordance with NFPA 80 and local code authority requirements.

E. Install doors to maintain alignment with frames to achieve maximum operational effectiveness and appearance. Adjust to maintain perimeter clearances as required. Shim as needed to assure the proper clearances are achieved.

3.3 CLEARANCES

A. Clearance between the door and frame head and jambs for both single swing and pairs of doors shall be 1/8 inch (3.2 mm).

B. Clearance between the meeting edges of pairs of doors shall be 3/16 inch plus or minus 1/16 inch (5 mm plus or minus 1.6 mm). For fire rated applications, the clearance between the meeting edges of pairs of doors shall be 1/8 inch plus or minus 1/16 inch (3.2 mm plus or minus 1.6 mm).

C. Bottom clearance shall be 7/16 inch (19 mm).

3.4 ADJUSTING AND CLEANING

A. Adjust hinges, locksets, and other hardware as necessary to ensure doors swing freely without binding and hardware is operating smoothly.

B. Clean product and remove NFRC label from door & adhere to a sheet of paper. Warranty card, NFRC label, and touch-up paint must be submitted to customer.

C. Adjust hinge sets, locksets, and other hardware. Lubricate using a suitable lubricant compatible with door and frame coatings.

D. Inspect finish and check for scratches. Touch-up as necessary with touch-up paint included in installation kit.

E. Remove temporary coverings and protection of adjacent work areas. Repair or replace damaged installed products.

F. Clean installed products in accordance with manufacturer’s instructions before owner’s acceptance.

G. Remove from project site and legally dispose of construction debris associated with this work.

3.5 PROTECTION

A. Protect installed products and finished surfaces from damage during construction.

3.6 SCHEDULES

A. Refer to Door and Frame Schedule appended to this section
END OF SECTION
