THE PROFESSIONAL WAY

ProVia® has developed a competitive position by catering to a niche market that demands a high degree of customization coupled with superior quality. You will find attention to detail is what our customers have come to appreciate and expect from us. We’re building your windows and our company to last a lifetime - it’s The Professional Way!

We’ve been building a reputation for quality since our company was founded over 40 years ago near Sugarcreek, Ohio, in the heart of Amish country, an area well known for quality and craftsmanship. While old-world craftsmanship is very much a part of our culture, it’s supported by modern design techniques and state-of-the-art manufacturing processes. We’ve created the perfect balance between traditional quality and modern technology.

CUSTOM CAPABILITIES

The materials, as well as the workmanship, give our custom made doors their exceptional quality and durability, far exceeding what is available in a ready-made door. Unlike consumer grade doors, professional-class doors are customized to your exact measurements for a better fit and a more secure and energy efficient door.

Entry Systems custom tailored for you.

At ProVia, not only do we manufacture energy efficient products, but we also exercise corporate environmental stewardship. Here are a few examples:

- We use Honeywell’s fourth generation Solstice® Liquid Blowing Agent that was formulated to be nonflammable while significantly lowering global warming potential and improve energy efficiency.

- We recycle paper, metals and glass.

- Solar energy panels are being used at three production facilities as part of the company’s effort to lower energy costs.

- Our Pollution Prevention Program dramatically reduced solvent usage.

- To save fuel, our trucks use the TriPac™ Idle Reduction and Temperature Management System.

- Paperless online ordering and internal paperless fax system reduces paper usage.

STEEL DOORS

DOOR STYLES

Our steel door features add up to a professional-class product. Whether you select Woodgrain Textured Steel or Smooth Steel, our entry systems will provide an elegant, durable and energy efficient entryway.

CUSTOM WIDTHS & HEIGHTS

Need a little more height or a little less width? We are pleased to offer customized door widths and heights in \( \frac{1}{8} \) increments.

DOOR STYLES

- 20-gauge Woodgrain Textured Steel
- 20-gauge Smooth Steel
- 20-gauge Smooth Steel with High-Definition Embossing
- 24-gauge Smooth or Textured Steel (used with all 20-gauge doors)
- 20-gauge smooth shaker

\( \uparrow \) Patent - USD621062
**STEEL DOOR ADVANTAGES**

- **ProVia doors are foam filled by a computer driven process** that ensures the optimal foam fill for maximum energy efficiency and strength.
- **Z-AC™ Threshold with auto-adjusting riser.** Standard with aluminum mill finish.
- **Composite top endcaps increase rigidity and energy efficiency.**
- **Special adhesives/thermal barrier reduce heat and cold transfer,** while our exclusive tab and slot system of mechanical interlocks gives the door exceptional structural strength.
- **To reinforce the lock and deadbolt area,** we add a **rigid composite lock block** to all of our steel doors.
- **Our 20-gauge steel doors give you 49% more galvannealed steel** than a standard 24-gauge door.
- **Plugless Window Trim** is optional on Legacy Steel (see Price List for available styles)
- **Composite bottom endcaps increase rigidity and energy efficiency.**

Our Fiberglass doors are available in Cherry, Mahogany, Oak, Fir and Smooth Series. Structurally, our door is far superior to traditional fiberglass doors with robust hardwood stiles and rails dovetailed at each corner. All fiberglass doors exhibit our exclusive DuraFuse™ finishing system featuring P3 Fusion which gives our doors lasting finish durability.

CUSTOM WIDTHS & HEIGHTS

Need a little more height or a little less width? We are pleased to offer customized door widths and heights in 1⁄8" increments.

FIBERGLASS ADVANTAGES

Stiles and rails are dovetailed and glued at each corner creating a structurally solid, integrated frame.

The 2½” finger-jointed 3-ply hardwood hinge stile provides superior structural integrity.

(Standard Duty: 4¼” finger-jointed 4-ply hardwood strike stile)

ProVia doors are foam filled by a computer driven process that ensures the optimal foam fill for maximum efficiency and strength.

The authentic wood look is made possible by using cutting-edge NVD (Nickel Vapor Deposition) technology by MasterGrain™.

Scientifically formulated compounds provide superior resistance to denting, splitting, cracking and warping.

High-definition panel profile creates excellent shadow lines and distinct panel designs.

Plugless Window Trim (Patent Pending) is standard on Signet (N/A Fir Series).

The inside door frame is hand-stained or painted to match your door providing you with a consistent visual appearance. (Signet doors are also available with a Steel L-frame.)

Stiles and rails are dovetailed and glued at each corner creating a structurally solid, integrated frame.

Door edge is constructed with cherry, mahogany, oak or fir wood matching the selected series.

The 4¼” finger-jointed 4-ply hardwood strike stile provides a solid mounting surface for decorative hardware and superior structural integrity.

The revolutionary DuraFuse™ Finishing System featuring P3 Fusion yields unprecedented finish durability.

A high-performance, composite material is utilized on all Signet fiberglass bottom rails, giving excellent rot-resistance.

The Z-AC™ Threshold with auto-adjusting riser. Standard with anodized bronze finish.

FRAMESAVER®

Shrinking and swelling occur from changes in relative humidity in the atmosphere. Water wicks up through wood fibers resulting in paint peeling, rot and mold. Traditional door frames begin to rot within 3-6 months of field installation.

Our finger-jointed composite bottom never absorbs water, warps, cracks or rots, and paints and finishes just like wood. Plus, FrameSaver is backed by the industry’s only fully-transferable lifetime limited warranty for ultimate peace of mind.

FRAME CLADDING OPTION
- PVC Coated Aluminum Cladding
- Match Most of Our Paint Colors
- Pre-Fitted for Custom Frame Depths
- Completely Maintenance Free Exterior
- No Follow-Up Painting is Required
- Now Also Available in Four Smooth Cladding Colors.

COMPOSITE FRAME OPTION
Our Composite door frame system option combines all the strength and convenience of wood with enhanced properties that make it moisture and insect resistant. Composite frame will not absorb or wick moisture and will never rot or splinter.

- Smooth white finish (inside frame rabbet is painted to match inside door color)
- Standard 4½” frame depth
- Available for steel or fiberglass doors
- Available for Single doors, French doors, Sidelites and Rectangle Transoms
- Standard Brickmold, Brickmold with Nailing Fin, 3¼ Flat Brickmold, 5¼ Flat or Custom Width Flat Brickmold up to 5¼†
- Frame Extensions from 4¾” up to 12¼”
- Custom Mullion Build-Up between door and sidelite†

IMAGINE THE POSSIBILITIES
WITH INSPIRATIONS™ ART GLASS

FEATURES

DESIGNS
The process begins with conceptual design. Our beautiful Inspirations Art Glass styles originated from the imagination of our in-house designers.

RESIN BEAD
The design pattern is created on our computer software, and sent to a CNC machine which applies a resin bead to the surface of the glass in one of our four stylish colors.

COLOR FILL
The color fill truly brings the glass to life. Five distinct color palettes are offered empowering you to perfectly reflect the personality of you and your home. Our craftsmen hand-apply this color fill to your glass.

Inspirations Glass is only available from ProVia.

All Inspirations Glass includes our ComforTech Glazing System.
If you can dream it, we can build it. Share your one-of-a-kind ideas or logo with ProVia, and allow our designers to customize a distinctive style just for you.
In most fires, the extreme heat can cause drafts causing certain amounts of air pressure pushing against a door. In the past, fire codes required only a neutral (negative) fire test. In this test, there was no pressure on the door. This made it easier to pass the test but did not replicate true fire conditions. Today, almost all building codes require fire doors to have a positive pressure rating. Positive pressure testing is conducted in an environment that best replicates those conditions that are present during an actual fire scenario.
